

Lightning Reach

Lightning Reach is a financial support portal which makes it easy for people to find and apply for a wide range of personalised support (including grants, benefits, help with bills and other resources) in one place.

CHALLENGE

More than 17 million people in the UK are currently facing financial hardship, yet there is over £19bn in unclaimed annual benefits and grant funding available in the UK.

SOLUTION

We offer a financial support portal which seamlessly connects people in financial hardship to the support they need.

REVENUE

Lightning Reach is B2B business that sells access to its platform to organisations including grant-making charities, local authorities, housing associations, utility providers, financial institutions, advice agencies and local support providers.

IMPACT

Social investment has enabled Lightning Reach to grow our team and build capacity to onboard more client organisations, onboard more support schemes, and ultimately facilitate more grants and support to people in financially vulnerable situations.
